GYPROCK[®]
Everything else is just plasterboard

Be inspired

Have you noticed how Australians have become fascinated with building design and interiors? It's a national sport. We are so much more informed about the endless possibilities we can explore in creating our personal, private spaces. We watch TV shows like *The Block*, read as many design magazines that we can muster, and never tire of chatting with friends about our mutual obsession to create the perfect home, room, kitchen or bathroom.

Modern building methods and materials allow us to take this inspiration and express our individuality. There is a transition from the limitations of four plain walls and a flat ceiling to more inventive and practical ways of organising our space.

Differing ceiling heights, bulkheads and raked ceilings create visual interest and are very practical ways to give direction to the free flow of an open plan space or creating a new look for an existing home. Wall niches showcase our prized possessions or house the large format TV, cleverly hiding the nest of cables and providing a beautiful flush finish. And our love for fresh air is obvious with outdoor kitchens and al fresco living, often forming the cornerstone to our own grand design.

Gimmicky decorating trends are giving way to a focus on timeless design elements that not only look very appealing but have utility as a principle. The uncluttered hallways that lead to open spaces with key focal points and the use of light in lines of glass running parallel to the ceilings are just some of the ways we think outside the square.

Creating the perfect living environment isn't just about design. We want our homes to be comfortable, practical and easy to maintain. Careful selection of products, like the Gyprock® range of specialty plasterboards that can help reduce noise transfer, resist knocks and bumps and even protect against fire and moisture, enables you to make your home the perfect sanctuary.

We hope you become inspired with the many great ideas, solutions and creative opportunities displayed in these pages. Remember, it's all about thinking outside the box and getting in touch with your inner designer!

GYPROCK

Everything else is just plasterboard

STOCKISTS

- 27** Where to find the furniture, furnishings and Gyprock products featured inside.

INTERIOR INNOVATIONS

Step out of the square and add chunks of chutzpah to your walls and ceilings. Using space, light and clever building design you can create stylish interiors that are both practical and beautiful.

When it comes to building or revamping your home, why not stir your imagination as well as your tin of paint? An important tip to remember is that walls and ceilings do not have to be flat. In fact, there are so many ways to add visual interest to your home interiors that create focal points, additional storage or privacy areas that don't hem you in.

LIGHT & AIRY

Create a sense of space and light in a room with raked ceilings that follow the line of the rafters, adding an air of distinction and a sense of freedom with their soaring lines.

NICHE MARKET

Niches are a great way to showcase your prized possessions, whether family photos, your favourite artwork or much-loved collectables. Adding architectural depth, they also provide smart storage without consuming valuable floor space.

HIGH DEFINITION

Adding definition and a unique architectural dimension to a room is easy with a coffered ceiling or bulkheads. They are great for delineating space, particularly in today's modern open plan homes.

SECLUDED SPACES

For additional privacy, nib and dwarf walls can create separations while maintaining a sense of space. Nib walls are short sections of wall that can be used for visual separation without losing the sense of flow from one area to the other. Dwarf walls do not extend to the full height of the room and are ideal for adding privacy in bathrooms and bedrooms.

CREATE WITH CORNICES

GYPROCK® INSPIRATIONAL CORNICES ENHANCE ANY INTERIOR DESIGN IDEA BY ADDING DETAIL AND PERSONALITY PLUS. WITH SIX STUNNING DESIGNS, THERE IS THE RIGHT CORNICE FOR ANY CORNER OF YOUR HOME.

Gyprock Alto™

Alto complements any contemporary space with a classic sensibility that's never over the top. A sassy 10mm step along the ceiling edge creates a crisp shadow for any modern home – the 90mm profile is uncomplicated but appealing, drawing the eye to its stylish format.

Gyprock Aria™

A compact 75mm cornice, Aria delivers a style that never goes off trend. Its subtle, slimline profile with an understated centre deflection is perfect when you are looking for unobtrusive elegance, especially in bedrooms or utility rooms.

Gyprock® Trio

Balance classic and contemporary elements with Trio, a powerhouse profile with its three-step 75mm format and strong, clean lines. It suits not just an ultra-modern space, but also blends well in a more traditional home.

Gyprock Tempo™

For a well-delineated design edge, Tempo is a popular choice for the latest homes. The multiple shadow lines

and 90mm profile create a sense of volume and work well in open plan living areas. If you are revamping an existing room, Tempo can be used over 55mm Cove cornices, which makes renovating so much easier.

Gyprock Symphony™

Music to any homeowner's ears, Symphony creates harmony with its softer curves, especially ideal for rooms with lower ceilings. Inspired by European master craftsmen, 75mm Symphony has a naturally more traditional style, combining a strong shadow line and multi-dimensional curves to create an attractive wave-like effect.

Gyprock Concerto™

For versatility, Concerto is the leader of the pack in cornice designs. With a combination of smooth curves, distinctive lines and sharp centre step, this 90mm cornice is ideal to incorporate an air of formality into a bedroom or living area. Throughout the day, the dramatic shadowing effect shifts the mood of the room, instantly adding depth of character and interest. Concerto can be installed with the stepped edge either facing up or down to create different effects.

DINE IN STYLE

Open concept homes are about flow and uninterrupted visuals. If you entertain frequently, an open plan dining room and kitchen makes perfect sense. Remember, with open interior spaces, you need big bold pieces that create focus.

crave list

Invest in some good quality, brightly coloured chairs for your dining area. Make sure they are hard wearing, fun and very comfortable for long family dinners and entertaining. These Replica Eames DSW chairs from Matt Blatt work a treat.

Live this...

In open plan homes, high traffic areas, like the kitchen, need to look integrated without appearing fussy or overly prominent. A Gyprock® bulkhead around the kitchen, for example, reduces the visual impact and makes the kitchen appear recessed into the wall rather than thrusting into the space.

STYLIST'S TOP TIP:

Strike a happy balance when it comes to kitchen clutter. A too-sterile approach won't make your house a home; instead, display some of your favourite kitchen tools or living herbs in simple pots.

crave list

All eyes will be on this retro-inspired platinum stand mixer in Raspberry Ice from KitchenAid.

HAPPY COMPANIONS

We love decorative, quirky fruit bowls that have a tactile sensibility like The Minimalist's crochet rubber bowl. Contemporary food processors and blenders now look like objets d'art in their zesty colours and add loads of fun to any kitchen benchtop.

Gyprock® bright ideas...

Upper limits

If you are building a new home or planning a renovation – large or small – some careful thinking about your ceilings will make a big difference to the mood and functionality of your living areas. Bulkheads are a great idea to add interest to bigger spaces or to tie in two rooms with differing ceiling heights. You can install downlights to showcase a display of your favourite art or create a feature in the middle of the open plan space. Bulkheads come in many shapes and sizes and are often used to mirror a central work unit in a kitchen or bar area or to highlight a unique light fitting. Keep in mind that the humidity experienced in many parts of Australia can cause ordinary plasterboard ceilings to sag, especially as wider joist spacings are now more common. Gyprock Supaceil™ plasterboard is designed to provide the perfect ceiling finish in all conditions, so let your imagination soar.

▶▶ kitchen

Live this...

For an open plan space, the kitchen needs to have a cohesive, visually organised look. It's not tucked away, but there for everyone to see from many areas of the house. Built-in refrigerators blend seamlessly into the kitchen, sitting flush with surrounding cabinets and saving precious aisle space. Ensure you use the right materials for the long life of your kitchen. **Gyprock Aquachek™** is specially designed for wet or humid spaces and works well in cooking areas.

STYLIST'S TOP TIP:

The refrigerator profile needs to be discreet, but some kitchen accessories should really make their presence felt. Add some lime green Tolix counter stools from Life Interiors to sing happy notes in the hub of the house.

crave list

You won't need to hide away your scrubbers and dishwashing liquid ever again. Natural and safe, Murchison-Hume's apothecary-style glass bottles and natural plant fibre scrubbers make handsome partners for your sink.

GAME ON...

When competition fever grabs you, head into your personal games room. Niches make clever storage solutions and are an innovative way to show off your prized possessions.

Live this...

Über tall vases ace it every time with an elegant simplicity, adding striking decorative elements to the space. Combined with atmospheric downlighting and distinctive light treatments, you'll never tire of chalking up your cue.

Gyprock® bright ideas...

School of hard knocks
Gyprock Superchek™ effectively resists damage caused by soft and hard body impact and its superior sound absorption makes it ideal for rumpus and games rooms.

LIVING EASY

Achieving a signature style is simple with clever use of ceiling detail, a subtle wall palette, the splash of bright accessories and statement furniture pieces.

Live this...

Varying ceiling heights, bulkheads or coffered ceilings serve to add visual interest and separate different living spaces. Nib walls help to define the living area and add a touch of intimacy. Don't be afraid to think boldly.

HAPPY COMPANIONS

Hosting an element of industrial design in a home setting works perfectly in open plan living spaces. Try the La Chapelle Camera Floor Lamp from Beacon Lighting to add contrast to comfortable surrounds.

crave list

Spend some time finding that special piece of furniture like this sleigh chair in Arena Red from Freedom. Loaded with personality, it shows you're bold with a sense of adventure.

STYLIST'S TOP TIP:

Combine a subtle colour palette with furnishing accessories that pop. Strong stripes and vivid florals in cushions make daring use of contrasts to give unique pizzazz.

DESIGNER DETAILS

A wooden coffee table like the Life Interiors Sean Dix Forte adds warmth in open spaces.

Gyprock® bright ideas...

Harmony in motion

We love the sense of freedom in open plan living without confining, blocked-off areas. To avoid the risk of creating unemotive spaces without flow, different ceiling heights between the living, entry and dining areas encourage natural movement through the home. They delineate the different spaces and create a welcoming and thematic approach. Nib walls also help define zones while still retaining light and freedom.

RELAXATION ZONE

Transform your home into an entertainment hub
with the ultimate home theatre experience.

HAPPY COMPANIONS

A swish rug like the Tea Garden from Designer Rugs complements the floor space and brings all the design elements in the room together cohesively.

DESIGNER DETAILS

The big screen and surround sound aren't the only focal point in your home theatre. Well-appointed furniture like the Gus Modern Designer sidetable from Life Interiors enhances the space.

Live this...

Don't just focus on the sound tech in your home theatre. Aim for a super comfy but stylish look with the right furniture and wall treatments. **Gyprock Concerto™** cornice's soft, complex curves complement any relaxation space.

LITTLE EXTRAS

Don't be wary of mixing and matching geometrical prints and florals. It livens up the mood and makes for a deluxe look. We love Bonnie and Neil Pacific Tile Black and Pottery Blue cushions.

crave list

Plush throws like the Carla from Freedom are a must to cosy up with when you're zoned out in the movie room. Think soft and sensuous.

STYLIST'S TOP TIP:

You've spent good money on the technology, so don't spoil the effect with unappealing furniture. The comfortable Replica Eames lounge chairs and ottoman from Matt Blatt and Life Interior's Valencia two-door cabinet are glamorous additions to the room.

Gyprock® bright ideas...

Extra dense

You don't want the surround sound from your home theatre disturbing the hardworking students in the household or your neighbours.

Gyprock Soundchek™ specialty plasterboard combined with **Bradford SoundScreen™** insulation keeps noise in its place.

MAKE AN ENTRANCE

First impressions count – the entry to the home is how you and your guests access your personal sanctuary. Your house can strike the right pose with a sculpture or the simplicity of a living plant.

GYPROCK SYMPHONY™ CORNICE

Inspired by European master craftsmen, the soft curves of Gyprock Symphony™ create a sense of harmony. Suitable also for rooms with lower ceilings, Symphony has a naturally more traditional style. The dominant shadow line and multi-dimensional curves create a soothing, wavy effect.

Live this...

Collect a range of door handles, fabric or wallpaper swatches, cornice and paint samples to create your own mood boards. Comparing the samples in different parts of your home where light varies room to room will give you an accurate idea of what will work best for each area.

Gyprock® bright ideas...

Collateral damage

High traffic areas like stairways and hallways suffer daily rough treatment.

Gyprock Superchek™ reduces the damage that soft or hard body impact can cause with its heavy duty lining paper and denser core, providing a more scuff-resistant, harder wearing surface.

LITTLE EXTRAS

Try something simple like a plant encased in this eye-catching, washable paper bag in brown from Uashmama.

STYLIST'S TOP TIP:

Keep hallways streamlined without excess clutter. Staying true to a contemporary look, choose skirting boards that are unfussy with clean lines. Enliven long sight lines with a fabulous pop art welcome mat or unique objet d'art.

LAND OF CONTRASTS

Contrast surface materials that have a raw, natural look with friendly colours and soft-textured furniture to maximise comfortable industrial living.

Live this...

Feature walls have become increasingly popular because they are a simple way to give a room a dramatic focal point, like this industrial-style treatment achieved by 'concrete' wallpaper from Vision Wallcoverings. A modern cornice like the timeless **Gyprock Alto™** will complement an industrial-styled space.

crave list

We love the streamlined shape of the Toro Lounge Chair from Blu Dot. It's perfect for the pared-down industrial look.

STYLIST'S TOP TIP:

Creating an industrial space is where good taste needs to come to the fore. Experiment with different tones and textures in your colour palette and swatches to create a more contemporary feel to your special retreat. Instead of painting a feature wall, try wallpapering. There are many wallpapers with unusual effects, like this concrete lookalike.

LITTLE EXTRAS

The geometrical profiles of cacti always have maximum impact. These beaker potted cacti from The Minimalist have a raw, no-frills look that perfectly suits an industrial style décor.

HAPPY COMPANIONS

Here's a clever and innovative way to manage your magazines – try Assemblages Book Girth Belt, from Lightly.

DESIGNER DETAILS

Industrial style themes and sharp looking furniture go together like peas in a pod. The Mrs Johnson Side Table from Freedom adds appealing dimension with its multi-faceted surface.

crave list

We love oversized coloured metallic lamps with long, articulated arms like the Sly floor lamp in copper from Oz Design (main image left). A real scene-stealer.

Gyprock® bright ideas...

Sounds of Freedom

Modern cornices like **Gyprock Alto™** can help define and soften industrial styled rooms. Alto features a streamlined profile with a subtle centre deflection design. A compact 90mm cornice, Alto echoes contemporary architecture at its best.

YOUR SPA RETREAT

Your bathroom is a haven away from the bustle of the day, so light the candles, grab your book and sink into a luxurious bubble bath...

Live this...

Niches or cut-outs in walls create fine lines and add interesting design elements as well as easy-to-clean storage solutions for displaying your premium bathroom products. Make sure you use the right materials.

Gyprock Aquachek™ plasterboard is resistant to moisture and humidity without compromising integrity. It is specifically designed for use as lining under tiles in wet areas of the home.

HAPPY COMPANIONS

Display your prestige beauty and cleaning products like those from Murchison-Hume on your niched shelving, side by side with a pretty display of fresh flowers.

STYLIST'S TOP TIP:

Grab some super-lush, boldly patterned bath towels (Paul Missoni Home from Top3 by Design) that feel like clouds and look like rock stars.

crave list

We love Oz Design Furniture's Malmo stool in mint. Ideal for a chatty spouse or housemate to perch on or use it for holding your book or back scrubber. For a luxurious Swedish spa effect, try non-slip wooden slats instead of a standard bath mat.

DESIGNER DETAILS

Use unfussy door handles like the Calida to keep your bathroom streamlined. They may be small, but the wrong door handle can spoil the look.

Gyprock® bright ideas...

Wet and wild

Bathrooms are more than just a place to shower and shave. They are one of the most frequently used spaces in the home, so materials need to be high quality and able to deal with the steam and splashes.

BEDROOM BLISS

Transform your bedroom into a peaceful retreat where you can relax and drift off into a restful sleep after a busy day. Think plump pillows, elegant lighting, soothing colours and subtle décor.

← *Live this...*

Stylish raked ceilings create a sense of restful lightness and airy space by day. At night you'll be glad of the peace and quiet with **Gyprock Soundchek™** reducing noise entering your private sanctuary.

STYLIST'S TOP TIP:

Experiment with colours when planning your intimate sanctuary.

Different shades of blue bring a sense of calm to the space or you can energise the colour palette with look-at-me brights. Think about your window treatments too, especially if street lights shine through at night. Time spent planning will result in the right decisions.

HAPPY COMPANIONS

Elegant lighting treatments, such as this stunning Audrey 1 light from Beacon Lighting, add an interesting reflective surface, echoing the geometry of the ceiling.

crave list

A comfy seat like this luxurious bucket chair in Lido Teal from Freedom brings the comfort quality in your bedroom to the fore.

LITTLE EXTRAS

Click On Furniture's replica Jens Risom's footstool is handy to rest your breakfast tray on or as an extra surface for books and clothes.

DESIGN DETAIL

Ultra modern, slimline door handles create lineal symmetry and speak volumes when it comes to the overall appearance of a room. They are an important element to a well-integrated design.

Gyprock® bright ideas...

The inner sanctuary

Designing your bedroom is one of the most important elements in creating a home that reflects your personality. But it isn't just about the colours on your walls or the lighting and window treatments. These are critical, but one of the most important points to consider for the bedroom is the noise factor. If noise intrudes into your place of rest and relaxation, sleep will be hard to come by. Gyprock Soundchek™ provides effective insulation against airborne and impact noise. Higher levels of noise control can be achieved by including Bradford SoundScreen™ in the wall cavity.

INSIDE & OUTSIDE

Australians love the outdoors. Increasingly, homes are built or retrofitted to combine the indoors with the outdoors bringing in the fun of the sun.

Live this...

Introduce additional light into the interior using clerestory windows near the ceiling line. **Viridian's** energy efficient double glazing helps provide year round comfort whilst increasing access to natural light.

al fresco entertaining

STYLIST'S TOP TIP:

Eastern style lighting teamed with a beaten metal stool such as Orson & Blake's Pradesh add a touch of the exotic to your home or can remind you of a favourite holiday. Stay relaxed with a theme and only introduce some of its elements, otherwise you may tire of it quickly.

HAPPY COMPANIONS

Vivid cushions from Bonnie and Neil and Freedom's Rajasthan rug with 'wow' help to create a fun ambience.

DESIGNER DETAILS

Collections of candles housed in interesting casings look great by day or by night. Try for bold looks like Click On Furniture's Sarai Trio candle set.

Gyprock® bright ideas...

The outdoor room

Outdoor kitchens go hand in hand with contemporary homes and frequently boast all the amenities and features of an indoor kitchen. Due to exposure to the elements, the outdoor kitchen needs to be robust for longevity and safety.

Gyprock Fyrchek™ MR is ideal for use in walls and ceilings in sheltered al fresco areas with external kitchens, where fire and moisture resistance is so important.

THE FINER DETAILS

Gyprock plasterboard's many purpose-built varieties help you get the most from your home, providing enhanced performance to create a more comfortable, quiet and durable environment for your family.

Sound of music

Exploring your inner musician doesn't have to mean playing electric guitar with the amp off. Smart soundproofing systems eliminate the need to hold back on your creative genius.

The silent treatment

Gyprock Soundchek™ is a high-density plasterboard with increased noise containment properties to help create quiet zones in your home. Combined with **Bradford SoundScreen™** insulation, it is ideal for walls and ceilings in home theatres, bedrooms, ensuite bathrooms, studies and even music rooms.

In the wet

Specially developed for use in wet areas, **Gyprock Aquachek™** has a moisture resistant core, face and back. Because Aquachek is not subject to moisture movement and has extremely low water absorption, it provides an excellent, stable substrate for ceramic tiles in bathrooms and laundries.

The superior choice

Gyprock Superchek™ features a reinforced core to effectively reduce the damage caused by knocks and bumps. The heavy duty lining paper provides a more scuff-resistant surface, making this plasterboard ideal for high traffic areas. Its extra density also provides additional sound absorption, making it the premium choice for all areas of your home.

Ultimate protection

Gyprock Fyrchek™ MR is a high performance fire and moisture resistant plasterboard. With a glass fibre reinforced core, it provides excellent protection in walls and ceilings in al fresco kitchens and living areas, particularly if open heating is used.

Gyprock®
bright ideas...

Creative thinking

Customised building materials open the door for creative thinking. With the right choice of materials, such as Gyprock plasterboards and cornices, your home will feature clean lines with interesting detail, from completely flush skirting boards to a wide choice of details and niches to suit every room.

Gyprock® Trio Cornice

High ceilings look dressed up and ready for a big night in with a creative cornice treatment. The **Gyprock Trio** cornice (right) with its stepped format casts evocative shadow lines that set the right mood.

GYPROCK®

Everything else is just plasterboard

Aria™

The smooth, streamlined profile of Gyprock Aria is perfect for spaces that define contemporary elegance.

Alto™

Gyprock Alto delivers a striking presence to any living or entertaining room. It features a clever 10mm step, creating a crisp shadow along the ceiling edge.

Perfect harmony

The sleek contemporary lines of Gyprock Alto and Aria cornice complement today's modern interiors. To see how cornice helps create perfect harmony in your home, check out our visualiser at visualiser.gyprock.com.au
